PROFESSIONAL SUMMARY

Fourth-year BS Information Technology student at De La Salle Lipa with hands-on experience in backend development, REST APIs, and mobile applications. Built practical projects using Java, Spring Boot, TypeScript, PostgreSQL, and Flutter with a focus on database integration and automated testing. Seeking a software engineering or backend development internship or entry-level role.

TECHNICAL SKILLS

- **Languages:** Java (Java 21 LTS), TypeScript, JavaScript, Python, SQL, Dart
- **Backend & Web:** Spring Boot 3.3, Spring Security, Spring Data JPA, Node.js, Express, Next.js, REST APIs, JWT
- **Mobile Development:** Flutter (Android), Responsive UI Design, State Management, SQLite Persistence
- **Databases & Messaging:** PostgreSQL, Redis (BullMQ), SQLite, Firebase Firestore, Cloudflare R2, Flyway
- **DevOps & Testing:** Docker, Docker Compose, Git, GitHub Actions, JUnit 5, Mockito, Testcontainers, Postman, k6

PROJECTS

Enterprise B2B SaaS Billing & Invoicing Engine | Java 21, Spring Boot 3.3, PostgreSQL 16, Docker, Flyway | GitHub

- Developed a multi-tenant subscription billing platform with JWT authentication, keeping each organization's business data separate.
- Implemented subscription billing, plan upgrades, and prorated payments with PostgreSQL row-level locking for concurrent checkouts.
- Configured Flyway database migrations and automated 40 unit and integration tests using JUnit 5, Testcontainers, and GitHub Actions.

Token-Bucket API Rate Limiter & Reverse Proxy | Java 21, Virtual Threads (Project Loom), Spring Boot | GitHub

- Built a reverse proxy and rate-limiting service using Java 21 virtual threads to handle high-concurrency request routing.
- Implemented per-client quotas using the token-bucket algorithm, returning RFC 6585 HTTP 429 status and rate-limit response headers.
- Tested concurrent request handling and token-bucket accuracy using automated multithreaded unit tests and k6 load scripts.

Malaya: Webtoon Reading Platform (PWA) | Next.js 15, TypeScript, PostgreSQL, Supabase | malaya-brown.vercel.app

- Developed a mobile-first reading PWA with continuous vertical scrolling, MangaDex API catalog integration, and offline caching.
- Built an SSRF-hardened image proxy API to securely route comic panels while blocking private subnets and cloud metadata endpoints.
- Integrated Supabase PostgreSQL and Prisma ORM with Row-Level Security (RLS) to manage user libraries and sync reading progress.

Kamunica: 3D Filipino Sign Language Platform (Capstone) | Flutter, Firebase Firestore, Cloudflare R2 | kamunica-landing.onrender.com

- Developed Flutter mobile interfaces and integrated 3D avatar animations for interactive Filipino Sign Language lessons on Android.
- Integrated Firebase Firestore and Cloudflare R2 to store curriculum modules, student progress data, and 3D animation files.
- Built web administrative tools for teachers to manage curriculum content, monitor student progress, and distribute APK releases.

EDUCATION

Bachelor of Science in Information Technology - De La Salle Lipa (DLSL) | Expected Graduation: June 2027

Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Networking, Web & Mobile Development

CERTIFICATIONS

- **Cisco:** Networking Basics (2025)
- **DataCamp:** Intermediate SQL, Introduction to SQL, Data Analysis with Python (2026)
- **Coursera:** Python Data Structures, Programming for Everybody (2022)
